You might even try to **MEMORIZE** them !!!

You have learned all the **basics** to continue to learn the hymns and other music written in this special easy-to-play fashion.

We have include **additional hymns** for you. Try learning a new hymn each day. Just follow these steps:

1. Remember to **COLOR** the chord symbols.
2. Tap and **count** the rhythm (do this three 3-5 times).
3. Play just the melody with the **Right Hand** while counting the rhythm (do this five times).
4. Play just the chords with the **Left Hand** while counting the rhythm (do this five times).
5. Play both the melody and the chords together. Start slowly and then build up the speed.
6. **Repeat steps 3, 4, and 5** until the hymn is mastered!

Finally ... try **teaching** this course to others ... it will help you **learn faster** and it will bless the lives of many others.

## "Top Secrets"

As you play when other people are singing, it is easy to get **flustered!** Just take it **easy and have fun!**

A **secret** we have learned if you do get flustered, or if the melody part is too difficult, is to continue playing the chords with the left hand and just **forget about the right hand!**

You could also try playing just the **first note of each measure** with the right hand and all the chords with the left hand. People will be able to sing the melody and you will still sound great!
